Next

Next

Install

Than copy serial

serial.txt - Notepad

File Edit Format View Help

Hint:
I used that and could so update to the newest version. Does probably also work with any other serial...
    The 3astUpRoaR

S/N: FFM9NEQKSUNY73BL2TH4CZ8ZA5GVR6DPTLRAWN77-DAZR7XMURPKE83QTA7S7LM63

FFM9NEQKSUNY73BL2TH4CZ8ZA5GVR6DPTLRAWN77-DAZR7XMURPKE83QTA7S7LM63
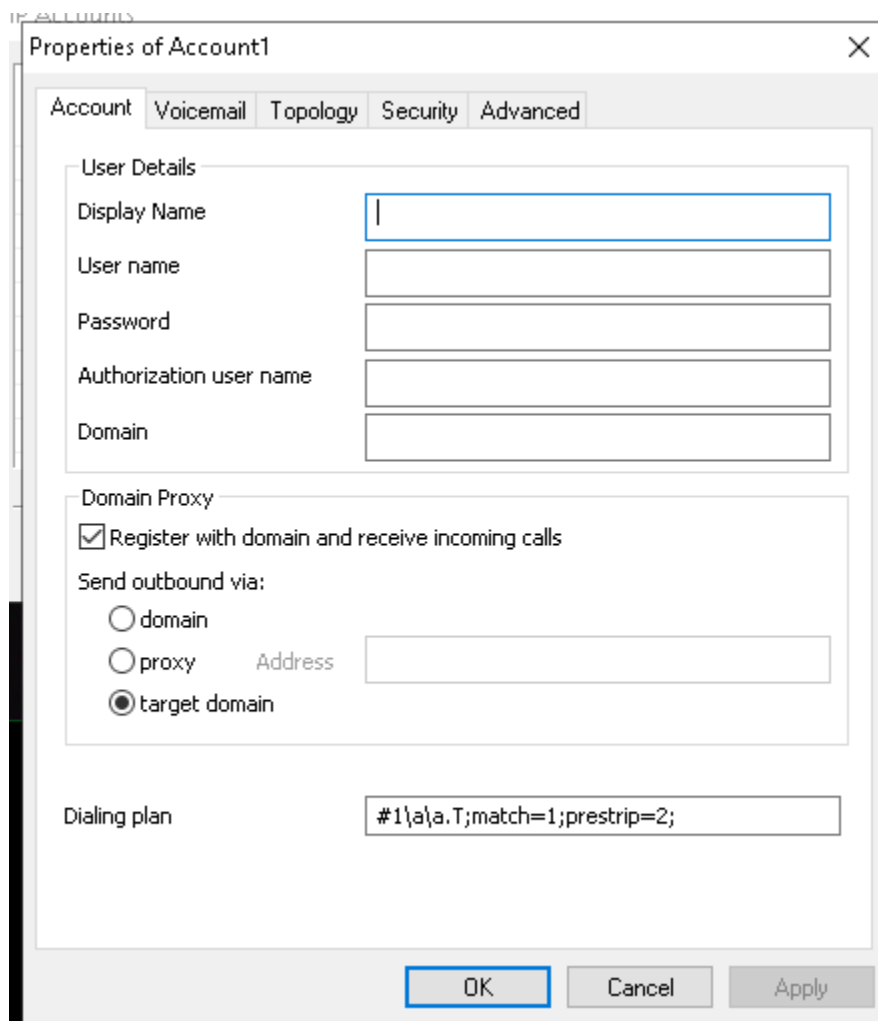

Insert serial

Than add sip

Click ADD

If I have sent credential for eyebeam for sip direct like example

Username = 111111

Password = 111111a

Domain – 88.80.145.6

Eyebeam should be written like this form (see the photo)

Properties of Account1   ✕

| Account | Voicemail | Topology | Security | Advanced |

User Details

Display Name	111111
User name	111111
Password	•••••••
Authorization user name	111111
Domain	88.80.145.6

Domain Proxy

☑ Register with domain and receive incoming calls

Send outbound via:

○ domain
○ proxy   Address
◉ target domain

Dialing plan   #1\a\a.T;match=1;prestrip=2;

OK   Cancel   Apply

Than click apply and OK

If is from vicidial should be written like this: (see next photo)

Properties of Account1   ✕

Account   Voicemail   Topology   Security   Advanced

User Details

Display Name   1001

User name   1001

Password   ●●●●

Authorization user name   1001

Domain   51.159.1.81|

Domain Proxy

☑ Register with domain and receive incoming calls

Send outbound via:

○ domain

○ proxy   Address

◉ target domain

Dialing plan   #1\a\a.T;match=1;prestrip=2;

OK   Cancel   Apply

Apply and OK

Now let choose right codecs

Click options

Click advanced

Click audio codecs
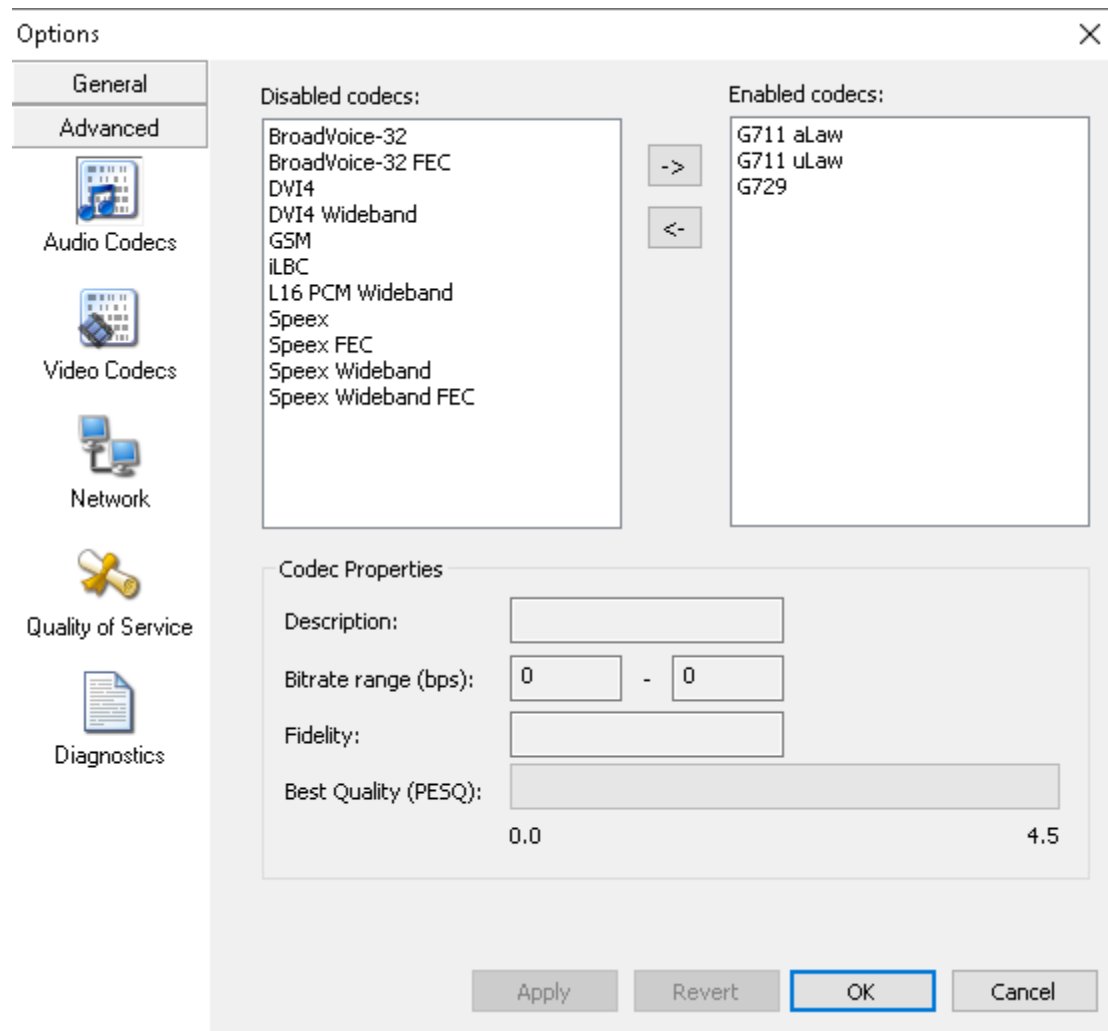

Those codecs should be active.
